Environmental Policy

By the very nature of our business, we are committed to having an overall positive impact on the environment by maximising efficient use of resources through re-use, recycling and recovery where environmentally beneficial.

As a company with strong environmental missions we are committed to practice what we preach, we demonstrate this by striving to:

- Meet and where appropriate exceed all relevant legislation and codes of practice. Co-operating fully and maintaining open relationships with all regulatory authorities.
- Ensure environmental issues are considered in the introduction of new processes, services and facilities in order to minimise adverse impacts and improve environmental performances.
- Provide support, information and training to company staff with respect of environmental issues and the environmental impact of their activities.
- Ensure procedures are in place for the monitoring, measure and control of environmental incidents and emergencies.
- Reduce and where practical prevent pollution to land, air and water, to include the monitoring and reduction of carbon emissions produced by our activities.
- Promote the economical use of resources and where practical purchase environmentally responsible goods and services.
- Minimising the waste disposal in landfill and increase the percentage of material recovered and recycled at our Waste Transfer Station.
- Assist our customers in reducing their environmental impact by supplying re-processing services and developing initiatives for recovered materials.
- Review this policy periodically to ensure that it evolves with the company's activities, environmental performance and legislation.
